

About FWS Group of Companies

The FWS Group of Companies, headquartered in Winnipeg, Manitoba, provides services to clients across Canada, and around the world.

Though based in the tradition of design-build construction, FWS utilizes a wide range of project development approaches that include various forms of Construction Management. The fully integrated FWS approach to construction and development unifies owner, consultants and contractor(s) into a results-oriented building team. The approach promotes single-source accountability, improved cost control, shortened time frames and a relationship that keeps clients coming back again and again.

FWS' team-based, open-book approach, combined with multiple options for contract format, provides clients with the assurance of competitive pricing, process integrity and peace of mind.

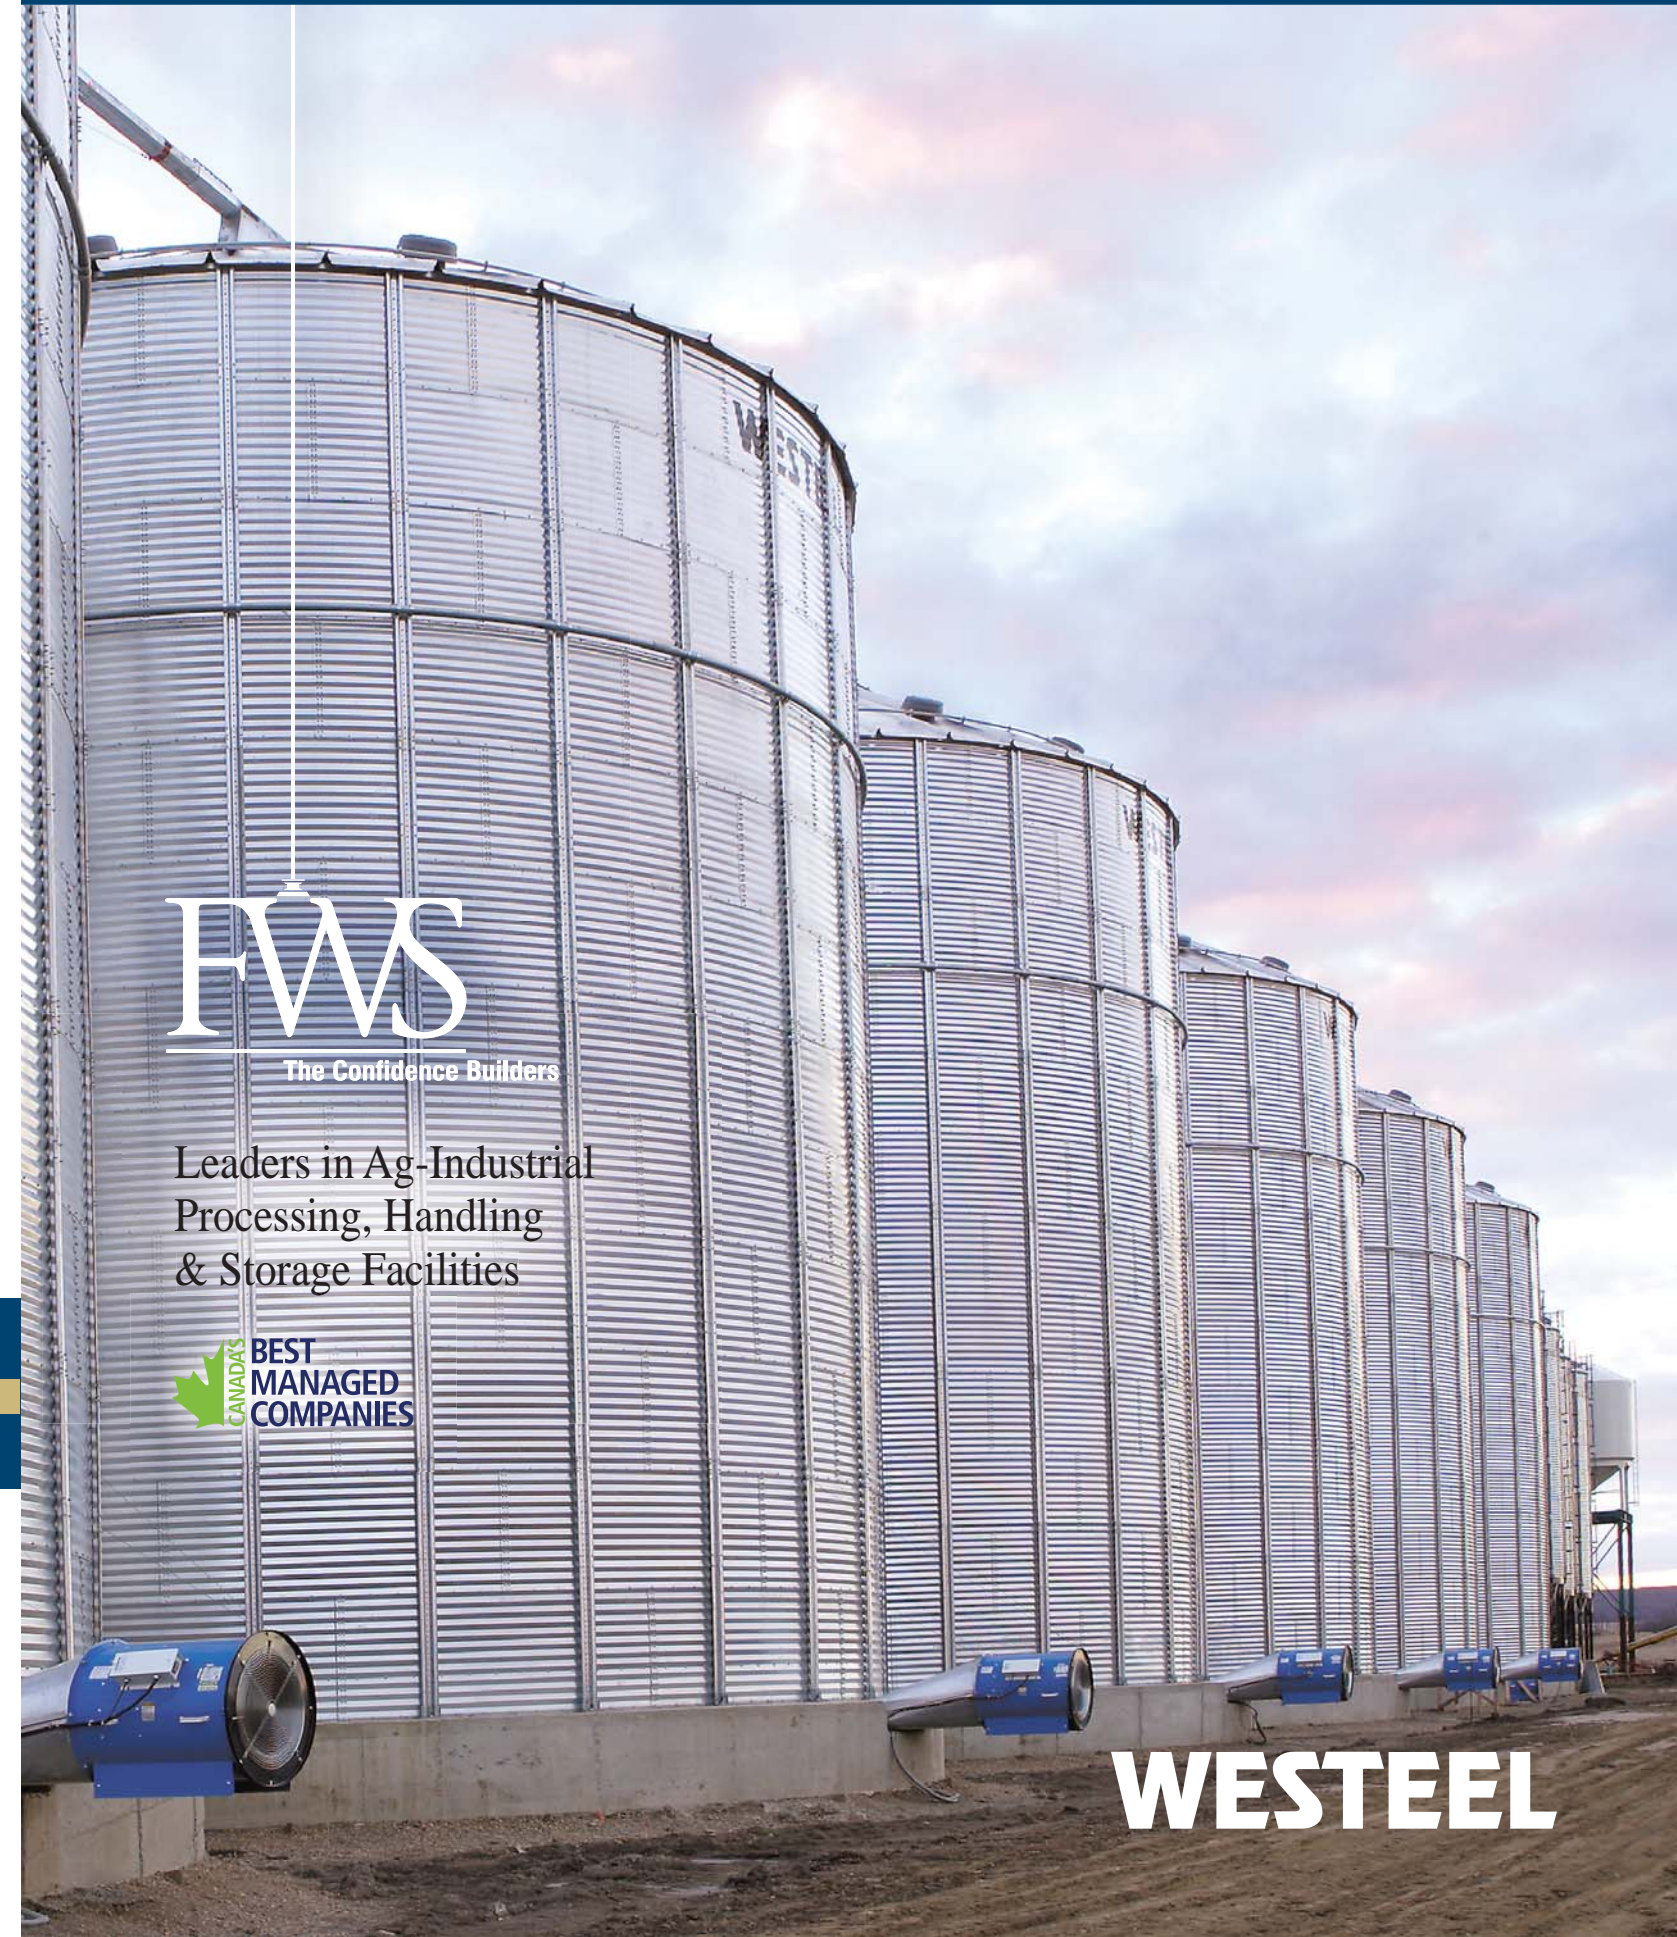

FWS Mechanical

FWS Mechanical, a division of FWS Industrial Projects Ltd., is the FWS Group's means of providing quality cost effective solutions for the wide variety of retrofit and system upgrades required by clients to achieve optimum performance. Employing a variety of qualified, seasoned construction professionals, FWS Mechanical leverages off of our extensive design experience, including the FWS Group's design-build construction of well over 100 grain handling facilities in Western Canada alone.

Bin Storage Expertise

FWS and Westeel, one of Canada's foremost manufacturers of steel storage products since 1905, have entered into an alliance to provide the grain industry with turnkey solutions to meet the ever growing capacity requirements of an evolving industry.

The combination of FWS' design-build commercial grain industry experience, coupled with Westeel's established and well recognized large bin storage product line, allows clients to receive the best of both worlds when it comes to their large capacity steel bin storage requirements.

The seamless design-build integration of new systems and facilities within existing plants is an FWS specialty and the inclusion of Westeel's grain storage industry experience provides prospective customers with unparalleled options.

The strength and experience behind our respective organizations allows us to focus both on immediate requirements within Western Canada, as well as the many and varied opportunities that exist nationally and internationally. FWS is an experienced developer of projects throughout North America and beyond, while Westeel products have global appeal due to the combination of high quality and cost effectiveness that is inherent within their product line. The design-build approach involves early stage consultation with prospective clients to ensure their objectives and budgets are properly accounted for, while also ensuring the availability of the most cost effective and timely solutions.

Ag-Industry Diversity

Operating domestically and internationally, FWS' diverse product offering originated with slipform concrete storage and handling facilities. Over the past twenty five years, our rapid evolution quickly made us Canada's foremost slipform concrete contractor, while also leading us into a broad spectrum of related agricultural handling, storage and processing facilities.

PRECISION,
PROFESSIONALISM,
EFFICIENCY & QUALITY.
